About Barbod

Barbod Lift Co., with over two decades of sustained and successful experience in the design, assembly, and supply of a wide range of elevators and escalators, is widely recognized as one of the leading and most reputable companies in this industry nationwide.

Since its inception, Barbod Sanat has proudly contributed to the execution of several thousand successful projects across Iran. These projects encompass a diverse array of structures, including high-rise towers, residential, commercial, and administrative complexes, as well as luxury villas designed in both modern and classical architectural styles.

The company consistently strives to deliver services that adhere to the highest international standards by leveraging state-of-the-art technology, employing a team of highly qualified and experienced professionals, and maintaining strict compliance with all relevant safety regulations.

Client satisfaction—including that of project owners, consultants, and developers—remains a cornerstone of Barbod’s success and a driving force behind its ongoing efforts to enhance service quality and broaden its scope of operations.

Barbod Lift is committed to delivering comprehensive, safe, and durable vertical transportation solutions that not only fulfill the technical demands of each project but also align seamlessly with the architectural aesthetics of the built environment.

Barbod Vision

Our vision is to establish Barbod Lift as a leading and influential brand in the elevator and escalator industry across the Middle East, while maintaining its distinguished position in the domestic market, achieving sustainable development, and delivering smart solutions aligned with the latest global technologies.

Barbod Mission

We are committed to providing specialized services in the design, supply, installation, and maintenance of various types of elevators and escalators, with the aim of creating a safe, comfortable, and modern environment for residents and users of building spaces. Quality, safety, innovation, and prompt responsiveness to customer needs are the four fundamental principles at the core of Barbod’s mission.

Barbod Values

At Barbod Lift, our actions and decisions are guided by a set of core principles:

- Flawless Quality: Utilizing the finest components and ensuring precision in every stage of the project

- Commitment to Safety: Full compliance with national and international safety standards

- Honesty and Transparency: Clear communication with clients and regular project reporting

- Quick Responsiveness: Active support and reliable after-sales service

- Continuous Innovation: Ongoing technical development and alignment with cutting-edge global technologies

Barbod Services & Products

Barbod Lift provides the following services with the highest standards of quality:

- Specialized design of elevators and escalators based on project specifications
- Procurement of components from reputable international brands
- Installation and commissioning of various types of traction, hydraulic, and gearless elevators
- Execution of escalator systems for commercial centers, stations, and high-traffic buildings
- Renovation and modernization of outdated elevators
- Ongoing support, maintenance, and periodic servicing
- Engineering consultancy for construction projects from design to execution

Elevator Types

Hydraulic Elevators

These use a hydraulic cylinder and piston to move the elevator car, commonly used in low-rise buildings

Traction Elevators

These elevators use ropes and a pulley system (sheaves) powered by an electric motor, often found in mid-rise and high-rise buildings. Traction elevators can be further categorized into geared and gearless, with the gearless variety being more common in high-rise buildings due to their speed and efficiency

Machine-Room-Less (MRL) Elevators

These elevators utilize a similar traction system as traditional traction elevators but integrate the machinery within the hoistway, eliminating the need for a separate machine room

Barbod Projects

Project We Have Worked On Since Our Establishment:

Traction MR Elevators	Traction MRL Elevators	Hydraulic Elevators	Escalators
>2000	>1500	>200	>300

Projects We Have Worked On This Year:

Traction MR Elevators	Traction MRL Elevators	Hydraulic Elevators	Escalators

Management Team

The sustained success and growth of Barbod Lift over more than two decades is the result of smart leadership, professional commitment, and the forward-looking vision of its management team.

Engineer Behshad Ghazanfari, the founder and CEO of the company, leads the organization with over 30 years of experience in the elevator and escalator industry, and a distinguished track record in the execution of large-scale construction projects. With deep insight into engineering, architecture, and project management, he has consistently emphasized delivering services that meet the highest standards of quality, safety, and aesthetics.

His leadership is marked by meticulous attention to detail, strict quality control, and effective collaboration with clients and business partners—core characteristics that define his management style.
